Task (circle one) Create Competency Create Assessed Skills

1. Did the user successfully complete the task in the 15 minutes provided?

Yes, the user completed the task in 5 minutes.

2. Did the user make any errors? What kind of errors?

Yes, the user pressed on the "create" button on the curriculum versions page, instead of selecting a curriculum version first.

3. Did the user seem confused? In what way?

Yes, the user was a bit confused at the start. However, as he goes along, the user can relatively navigate through the U.I. to an extent.

4. Describe the user's apparent emotional state.

The user seemed visibly confused during some parts of the tasks, however, the user displayed minimal emotions during the rest of the task.

5. Based on your observations of the user's behavior, are there specific parts of the Simon UI that you feel are unclear or confusing?

The most important part is the landing page of the competencies page. It should be made clearer that the user must

6. Any other comments or observations? choose a curriculum version before creating a competency.

Task (circle one)    Create Competency

Create Assessed Skills

1. Did the user successfully complete the task in the 15 minutes provided?  
yes, It took around 5 minutes to creat Assessed skills
2. Did the user make any errors? What kind of errors?  
quite a few error since the buttons and a path to create skills is confusing and not knowing if you need to press which buttons and from where
3. Did the user seem confused? In what way?  
users does confused since the way VI shows is just able to create in some specifics way, and not telling how to (path to create is unclear like a maze)
4. Describe the user's apparent emotional state.  
confused and unsatisfied when ~~the~~ creating is unclear
5. Based on your observations of the user's behavior, are there specific parts of the Simon UI that you feel are unclear or confusing?  
no tutorial on how to create and unclear button features, also many steps to create
6. Any other comments or observations?  
clear buttons feature and less steps might be better to make less confusion
